

CENTRAL TABLELANDS

**EMBRACING
THE COUNTRYSIDE**

This luxurious project in the Central Tablelands epitomises elegance and sophistication, drawing inspiration from the most prestigious modern architecture Los Angeles has to offer. With meticulous design and attention to detail, this grand and spacious build features state-of-the-art finishes throughout, creating a seamless and fluid experience for all who enter.

With breathtaking views, the owner envisioned a home offering views from all sides, overlooking the Valley and the stunning countryside beyond. The project presented significant technical challenges, particularly in the design and installation of the home's expansive double-glazed windows and oversize doors (measuring 3m in height), which were used to optimise views while minimising visual obstructions.

Another major hurdle in this project was achieving a consistent design across every opening while preserving visual integrity.

The use of the Series 704B SlideMASTER™ Sliding Door in various applications made this design vision possible. A corner installation of the Series 704B by the kitchen allows fresh air to fill the house while cooking, simultaneously providing an uninterrupted view outside. The Series 450 Wide Gap Double Glazed CentreGLAZE™ Framing enabled the inclusion of larger IGUs (40mm), essential to maintaining thermal efficiency throughout the home when using such large spans of glass.

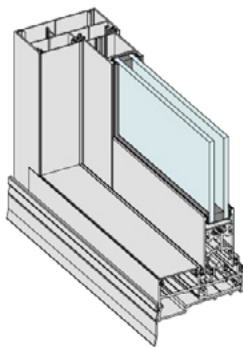

The result is a seamless indoor-outdoor experience with exceptional climate control and thermal performance, capable of withstanding the region's extreme temperature fluctuations from -5°C to over 45°C.

The products used and the results achieved led to high customer satisfaction, fostering a desire to use these products in future projects.

■ SERIES 704B SLIDEMASTER™ SLIDING DOOR

- × Bottom rolling sliding door with minimal sill recesses.
 - × Tested for compliance with relevant Australian Standards.
 - × The extra strong multi-hollow meeting stiles allow large sliding doors to be fabricated in high wind load areas.
 - × Bottom rolling doors run on heavy duty double or quad bogey wheel carriages up to 300kg with heavy duty quad rollers.
 - × With the correct glass, glass size, seals and hardware, 704B can achieve BAL40 certification.
- Maximum Panel Height: 3300mm
Maximum Panel Width: 2500mm
Maximum Glass Thickness: ≤24mm
SHGC Range: 0.21 - 0.66
Uw Range: 3 - 6.2

At Evolution Windows we custom make exceptional aluminium or timber windows and doors for residential and commercial projects in Sydney, Blue Mountains and surrounds. We like to think outside the window! We'll always look for ways to ensure your project goes smoothly.
